Organization of the Course

Lecture

- each week (Thursday, 8:30–10:00)

Exercises

- all exercise groups on Thursdays (weekly during the whole term)
- one assignment (4 exercises) per week, published on course website \texttt{http://fmv.jku.at/fm}.
- changing group during semester is \textit{not} possible
- registration in KUSSS for one group is mandatory
How to Pass

- **four minitests** plus participation in exercise groups
  - □ if passed positively, no further exam is required
  - □ four regular tests + backup test for repeating each test
  - □ attendance of weekly exercise groups

- **retry exams**
  - □ if minitests were not passed (positively)
  - □ over whole content of the course (lecture and exercises)
  - □ dates in early and late autumn 2019
  - □ extra registration in KUSSS required

In either case, you get two certificates (with the same grade): one for the lecture and one for the exercises
Minitests

- if you hand in one test, you will be graded
- dates of regular tests: see KUSSS in the room of the lecture from 8:00-8:30
- working time: 30 minutes
- content of each minitest: last three (minitest 1,2) or two (minitest 3,4) lectures/exercises
- one minitest is worth 15 points
- backup test: end of semester (all four tests can be repeated)
Exercises

- 4 exercises per week (40 in total)
- Weekly assignments are published on course website http://fmv.jku.at/fm
- Solved exercises have to be marked in our Moodle course before 8am on the day of the exercise (no upload is necessary)
- Marking an exercise as solved means you are able to present it in the class
- Quality of the presentation influences grading substantially
- Marking exercises as solved and not showing up on the day they are discussed in the exercise group will result in a penalty of -4 points
Grading

■ 80 points are possible in total
  □ for the minitests up to 60 points are possible
  □ for the exercises up to 20 points are possible (0.5 points per exercise)

■ to pass the course you need to have
  □ 3 tests positive (a test is positive with $\geq 7$ points)
  □ $\geq 40$ points in total
  □ convincing presentation of solved exercises

■ remark:
  □ no minimal requirement on number of solved exercises
  □ it is not possible to hand in exercises at a later point in time
Questions?

1. ask your colleagues

2. ask in the Moodle forum if you have a question of general interest

3. write an email if you have a personal question
