Organization of the Course

Lecture

- each week (Thursday, 8:30–10:00)

Exercises

- all exercise groups on Thursdays (weekly during the whole term)
- one assignment (4 exercises) per week, published on course website http://fmv.jku.at/fm.
- changing group during semester is not possible
- registration in KUSSS for one group is mandatory
How to Pass

■ bi-weekly minitests plus participation in exercise groups
  □ if passed positively, no further exam is required
  □ five regular tests + one backup test
  □ attendance of weekly exercise groups

■ retry exams
  □ if minitests were not passed (positively)
  □ over whole content of the course (lecture and exercises)
  □ dates in early and late autumn 2018/early summer 2019
  □ extra registration in KUSSS required

In either case, you get two certificates (with the same grade): one for the lecture and one for the exercises
Minitests

- if you hand in one test, you will be graded
- dates of regular tests: 12.4., 26.4., 17.5., 7.6., 21.6. at 9:30 in the room of the lecture
- working time: 20 minutes
- content of each minitest: last two lectures/exercises
- one minitest is worth 12 points
- backup test: 28.6. at 9:30 in the room of the lecture
  - over whole content of lecture/exercises
  - replacement for one test
Exercises

- 4 exercises per week (40 in total)

- Weekly assignments are published on course website http://fmv.jku.at/fm

- Solved exercises have to be marked in our Moodle course before 8am on the day of the exercise (no upload is necessary)

- Marking an exercise as solved means you are able to present it in the class

- Quality of the presentation influences grading substantially

- Marking exercises as solved and not showing up on the day they are discussed in the exercise group will result in a penalty of -4 points
Grading

- 80 points are possible in total
  - for the minitests up to 60 points are possible
  - for the exercises up to 20 points are possible (0.5 points per exercise)

- to pass the course you need to have
  - 3 tests positive (a test is positive with $\geq 6$ points)
  - $\geq 40$ points in total
  - convincing presentation of solved exercises

- remark:
  - no minimal requirement on number of solved exercises
  - it is not possible to hand in exercises at a later point in time
Questions?

1. ask your colleagues

2. ask in the Moodle forum if you have a question of general interest

3. write an email if you have a personal question
